A GLOBAL
LEADER

RESOLVE MARINE'S GLOBAL FOOTPRINT, EXPERT PERSONNEL, AND NETWORK OF EQUIPMENT AND ASSETS ARE READY TO RESPOND 24/7.

WORKING WITH US

Our People

People, technology, experience, and responsiveness are at the core of who we are and what we do. Our team of specialized project managers and salvage masters, civil and marine engineers, naval architects, divers, oil spill experts, marine firefighters, and dedicated support staff have completed projects on every continent in some of the most remote locations in the world.
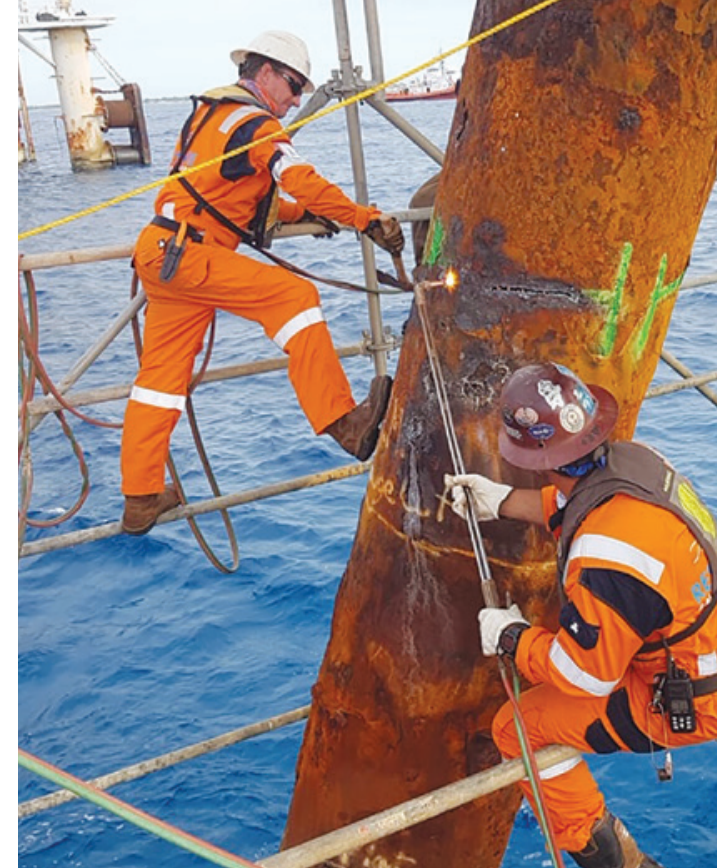

Our Assets

An ethos of continual reinvestment ensures that our specialized equipment operates to the highest standards and can be deployed 24/7 from warehouses and depots located strategically in ports around the world.

Our Mission

To serve as a world leader in providing safe, innovative maritime solutions.

Headquartered in Fort Lauderdale, Florida, Resolve Marine has personnel, offices, response warehouses, equipment depots and assets in the United States, Europe, Africa and Asia.

CORE SERVICES

Emergency Response

Resolve Marine has completed some of the most complex emergency response operations in the world. By utilizing our owned and maintained assets and leveraging a network of resource partners, our experienced response professionals stand ready to assist every vessel type. When faced with a maritime emergency, Resolve Marine provides our clients confidence that every aspect of our response is safe and environmentally sound.

Salvage, Recovery & Environmental Mitigation

We have extensive experience working on complicated projects that require creative planning and execution in compliance with local regulations. When it comes to removing floating or submerged vessels, pollutants from sunken vessels, or remains of offshore structures, our team collaborates, analyzes, simulates, and organizes tactics that complete each job safely, on time, and on budget.

Compliance

Our commitment to regulatory compliance underpins our reputation in the industry. Since the inception of the OPA 90 Salvage and Marine Firefighting (SMFF) regulations, hundreds of shipowners have entrusted Resolve Marine to provide their vessels with comprehensive response readiness.

- **SMFF.** In the United States and its territories Resolve Marine has the largest inventory of SMFF response equipment and personnel: 23 owned depots and four warehouses.

- **Alaska APC.** We provide comprehensive oil spill response Alternate Planning Criteria (APC) coverage for vessels transiting Alaskan waters and calling Alaskan ports. Eleven oil spill and three salvage response depots in Alaska are complemented by ocean-going response vessels, owned aircraft, and personnel. We offer complete coast-to-coast compliance: OPA 90 SMFF, Alaska Federal APC Oil Spill Response, and Alaska State Non-Tank Vessel Oil Spill Coverage.

- **China SPRO.** A one-stop solution for Ship Pollution Response (SPRO) coverage across China's extensive coastline with fully stocked warehouses and a network of partners based in major Chinese ports.

Specialized Marine Services

From drydock repairs and welding services, to demolition and marine civil works projects, Resolve Marine brings deep technical expertise to every task. Our global response center provides 24-hour vessel monitoring. A naval architecture and marine engineering group conducts sophisticated planning for recovery, salvage, and special projects. Shipyard repair, towing, aviation and drydock services are available in select ports and locations worldwide.

Resolve Academy, the educational arm of Resolve Marine, specializes in firefighting and safety training that prepares students for onboard and offshore emergencies and port and marine patrol response. Academy instructors coach, mentor, and challenge students through realistic simulations and hands-on training, preparing them both mentally and physically to handle any situation.

RESOLVE MARINE HAS SERVED AND SUPPORTED CLIENTS AND PROJECTS FOR NEARLY 40 YEARS.

OUR STORY

Founder Joseph Farrell, Jr. began operations in 1980 with the RESOLVE, a single tug that provided salvage services to coastal freighters and small vessels in the Caribbean. In 1984, Joe formed Resolve Marine, as it is known today. In the wake of U.S. Coast Guard OPA 90 regulations, operations expanded: equipment depots were established across North America and a maritime firefighting training facility was launched to train personnel. After refining the emergency response model domestically, the company expanded globally. Joe now leads Mission Resolve, the philanthropic arm of Resolve Marine that focuses on removing plastics and other debris from the world's oceans and other humanitarian, educational, and community efforts.

OUR CLIENTS

Resolve Marine clients include public and private shipowners and operators, protection and indemnity insurance companies, hull and machinery underwriters, marine consultants, global energy companies and government agencies. No client or task is too large or too small when it comes to our ability to efficiently provide service and support. Worldwide, we have completed complex, high-profile projects–requiring sophisticated planning, engineering, and the fabrication of custom equipment–and provided emergency response support to local fishing vessels and communities impacted by severe weather.

OUR SAFETY CULTURE

The safety and health of our employees is a guiding principle in how we do business, exemplified by our safety culture. We are committed to continual improvement and keeping our people, clients, and the environment safe.
